

AMSPDC and COMSEP are announcing a pilot program designed to provide external referee letters for community based teaching faculty who are eligible for promotion at their institution. COMSEP has provided a list of experienced educators - at the Associate and Full Professor level - who could be solicited for “arms length” letters. The pilot program will accept letter requests for the first three faculty members, and then assess the request volume and resources required to meet this volume. If you would like to get more information or request this service, please contact Dr. David Deutsch, Chair of Pediatrics, University of Illinois College of Medicine at Rockford, ddeutsch@uic.edu.
