| John Cunningham | U of Chicago |
| Robert Shaddy | Keck School of Medicine (California) |
| Satyan Lakshmanrusimha | U of California, Davis |

Clinical Care Committee: Accomplishments Last 12 Months

- **The AMSPDC Clinical Care Committee strives to share best practices and approaches to new challenges in an effort to promote access to high quality care for all children. With these goals in mind, the committee focused its attention on the unprecedented challenges created by COVID-19. Most centers felt under-prepared to meet the clinical strains of this pandemic. We continue to gather and disseminate information as needed**
- **We are collaborating with cFTE work force in gathering complimentary data:**
 - **FTE allocations for administrative roles**
 - **Funds flow in an academic environment**
- **The Committee is interested in learning more about models for primary care training sites in academic departments. That work is being pursued by the education committee**

Clinical Care Committee:

Goals for the next 12 months

- **Continue Supporting cFTE work being led by AAAP**
- **Supplement this work with additional FTE work including Admin FTE definitions**
- **Begin looking at funds flow with an eye towards creating a repository of options available to Chairs to negotiate**
